

MUHAMAD FERDIANSYAH

Infrastructure Engineer — ISP Network Operations, Linux, & Automation

Lebak, Banten, Indonesia | ferdi.cloxt00@gmail.com | +62 858-6340-9811 | github.com/cloxt01 | linkedin.com/in/muhamad-ferdiansyah

SUMMARY

Infrastructure Engineer running ISP infrastructure for 2,000+ active subscribers on MikroTik RouterOS, Linux servers on Proxmox VE, FreeRADIUS, and Prometheus + Grafana monitoring. Built an in-house RADIUS + billing system that replaced a vendor license (saving ±IDR 12M/year) and automates repetitive operations with Ansible.

WORK EXPERIENCE

Infrastructure Engineer — ANS Radius, Lebak, Banten, Indonesia (Jan 2026 – Present)

- Manage ISP infrastructure for 2,000+ active subscribers: 3 MikroTik routers (routing, firewall, NAT, PPPoE, bandwidth management) and 5 Linux servers on Proxmox VE.
- Built and operate an in-house RADIUS + billing system (FreeRADIUS, Laravel, MySQL) replacing a vendor license — saving ±IDR 12M/year.
- Automated subscriber provisioning, config backups, and service deployments with Ansible, cutting the ops team's repetitive manual work.
- Built a Prometheus + Grafana monitoring stack for network and server health visibility and faster incident response.
- Operate core production services: Nginx reverse proxy, MySQL, DNS/DHCP, and Docker containers for internal applications.

Production Operator — PT Gajah Tunggal Tbk, Tangerang, Indonesia (Jan 2025 – Jul 2025)

- Ran production processes according to company SOPs with a focus on quality, productivity, and workplace safety.

IT Support (Internship) — Regional Parliament Secretariat of Lebak (Jul 2023 – Dec 2023)

- Vocational school internship: OS and application installation and configuration, end-user device troubleshooting, and document management.

KEY PROJECTS

- **ANS Radius** — production RADIUS + billing system for an ISP/RTRWNet: centralized FreeRADIUS authentication, 2,000+ subscriber management, automated invoicing and suspension, MikroTik integration. (ansradius.id)
- **ANS Ansible** — provisioning automation and configuration management playbooks: config backups, service deployment, and Linux server hardening. (github.com/cloxt01/ans-ansible)

SKILLS

- **Networking:** MikroTik RouterOS, VLAN, PPPoE, Routing, Firewall
- **Systems:** Linux (RHEL/Ubuntu), Proxmox VE, Docker
- **Automation & Monitoring:** Ansible, Prometheus, Grafana, CI/CD, Python
- **Services:** FreeRADIUS, Nginx, MySQL, DNS/DHCP

EDUCATION

- **SMKN 1 Rangkasbitung (Vocational High School)** — Computer and Network Engineering (May 2021 – May 2024)
- **Universitas Pendidikan Indonesia** — Marine Information System (Aug 2025 – Dec 2025)

CERTIFICATIONS

- Competency Certificate: Troubleshoot & WAN Security Network Assessment — Cyber K (Mar 2024)
