ABOUT ME

IT Infrastructure Engineer with hands-on experience in building and managing ISP infrastructure, including MikroTik RouterOS networking, Linux servers, Proxmox VE virtualization, billing systems, and network automation. Experienced in integrating network infrastructure, servers, databases, and applications to improve service reliability and operational efficiency.

SKILLS

- **Technical Skills** : MikroTik RouterOS, Server Administrator (Linux, RHEL) , Proxmox VE, FreeRADIUS, Docker, Nginx, Scripting / Automation (Python, Bash, PHP), Cron, Git & GitHub Actions; Monitoring (Prometheus, Grafana), Diagram as Code (DaC), Ansible, Infrastructure as Code (IaC)
- **Operational Support** : Change Communication, Incident Coordination, Escalation Handling, Technical Documentation, Cross-functional Collaboration
- **Network Skills** : TCP/IP, VLAN, PPP, DHCP, DNS,VPN, Proxy, Firewall, Routing, Radius

WORK EXPERIENCE

Infrastructure Engineer

ANS Radius | Jan 2026 - Now

Responsibilities

- Managing and maintaining ISP network infrastructure based on MikroTik RouterOS to support more than 2,000 active customers.
- Managing network services including routing, firewall, NAT, bandwidth management, PPPoE, and service availability.
- Managing Linux-based servers and virtualization infrastructure using Proxmox VE for ISP local operational services.
- Managing RADIUS (AAA) infrastructure for customer authentication and access control.
- Managing IT Facilities including servers, user devices, and supporting systems.
- Providing L2/L3 technical support for ISP infrastructure, including network engineering, Linux server administration, virtualization, application troubleshooting, and system improvement.
- Managing Attendance System (*Attendance Management*)
- Integrating network infrastructure, Linux servers, databases, and internal applications to support business operations.
- Monitoring infrastructure performance and troubleshooting network, server, and application issues.
- Creating technical documentation including network topology, system architecture, and operational procedures.

Key Achievement

- Developed internal ISP billing, monitoring, and network automation applications to improve operational efficiency.
- Replaced third-party ISP billing solutions with an internally developed system, reducing operational costs by approximately Rp12 million per year.

Production Operator

PT Gajah Tunggal Tbk | Jan 2025 - Jul 2025

Responsibilities

- Performed production processes according to company Standard Operating Procedures (SOP) while maintaining product quality, productivity, and workplace safety.

Professional Development

- Continuously developed technical skills outside working hours through self-learning in Web Development, Version Control and Automation to support career growth in Information Technology.

Office Support

Sekretariat DPRD Kabupaten Lebak | Jul 2023 - Des 2023

Tanggung Jawab

- Installed and configured operating systems and application software to support internal operational activities.
- Performed software installation, configuration, and troubleshooting for user devices and operational systems.
- Managed incoming and outgoing document archiving to maintain organized administrative records.

CERTIFICATION

Competence / Skills

- **Troubleshoot & WAN Security Network Assesment Certification | Cyber K**
Computer & Network Engineer | Mar 2024

Competition

- **National Essay Competition Finalist | Universitas Udayana**
PENA 2 2026 | Feb 2026
 - Finalist in the Poster Presentation category at the National Essay Competition.
- **Product Innovation Competition | Universitas Pendidikan Indonesia**
ASIK Vol. V | Des 2025
 - Awarded Top 3 in the Product Innovation Competition at the department level.
- **Product Innovation Competition | Universitas Sultan Ageng Tirtayasa**
Agromaritim Fest 2025 | Nov 2025
 - Received the Gold Award in the university-level Product Innovation Competition.

EDUCATION

Universitas Pendidikan Indonesia

Marine Information System | Augst 2025 - Dec 2025

- Participating in academic projects related to information systems, software development, and digital solutions for the maritime sector.
- Contributed to collaborative projects, capstone projects, and technology-based innovation competitions.
- Applied software development, system analysis, and problem-solving skills through academic and personal projects.
- Conducted research and prototype development integrating information technology with maritime applications.

SMKN 1 Rangkasbitung

Computer and Network Engineering | May 2021 - May 2024

- Built a strong foundation in computer networking, operating systems, hardware, and IT infrastructure.
- Completed hands-on laboratory projects involving network configuration, server administration, and computer maintenance.
- Developed practical skills in network troubleshooting, system installation, and IT support.
- Participated in collaborative technical projects to strengthen analytical and problem-solving skills.

PROJECT

ACADEMIC

Fisherman Safety System Prototype

ASIK Vol. V 2025 | Nov 2025 – Dec 2025

Status: *Completed* | Role: *Team Lead*

- Developed a digital prototype focused on improving fishermen safety during offshore activities.
- Designed an emergency alert and location tracking system to support rapid response during critical situations.
- Implemented Bluetooth Mesh communication concept for device-to-device connectivity in maritime environments.
- Led project planning, system concept development, digital prototyping, and project presentation.
- Managed team coordination and ensured project objectives were achieved.

Coral Reef Cultivation System Prototype

Agromaritime Fest 2025 | *Sep 2025 – Oct 2025*

Status: *Completed* | Role: *Team Member*

- Developed a digital prototype to support coral reef cultivation education and awareness.
- Designed and developed a web-based prototype to provide information and support learning activities related to coral reef conservation.
- Contributed to system design, prototype development, and project presentation preparation.
- Collaborated with team members to deliver the project concept and digital solution.

NON - ACADEMIC

ANS Radius | (Ongoing)

Web Application - Work (Individu) | *1 Jan 2026 - Now*

- Developing a Laravel-based ISP billing and management platform for local ISPs and community networks (RTRWNet).
- Integrating centralized RADIUS authentication, customer management, billing, monitoring, and network automation into a unified platform.
- Designing and maintaining backend architecture, database schema, RESTful APIs, and operational automation.
- Supporting Linux server deployment and infrastructure integration for ISP operations.

Repository: <https://github.com/cloxt01/ans-radius>

Website: <https://ansradius.id>

Compass | (Ongoing)

SaaS Web Application - Personal | *Okt 2025 - Sekarang*

- Developing a SaaS platform for multi-platform job discovery and application management.
- Designing and implementing backend services, database architecture, authentication, subscription management, and payment integration.
- Building automation workflows to streamline job search, application tracking, and user management.
- Developing the application using Laravel, Livewire, MySQL, and modern frontend tooling.

Repository : <https://github.com/cloxt01/compass>

Website : <https://cloxt.tech>

Visual Artwork “Dari Masa ke Masa” - Work (Individu) - (Finished)

Mixing Center Cup 2025 – PT Gajah Tunggal Tbk | *6 Feb 2025 - 18 Jul 2025*

- Designed and produced a thematic visual artwork representing the company's development over time.
- Planned the visual concept, prepared project documentation, and managed the production process.
- Collaborated with stakeholders to deliver the final artwork for an inter-plant competition.

COURSE

- Laravel 11 – Codepolitan
- PHP (OOP) – Codepolitan
- JavaScript (OOP & DOM) – Codepolitan
- AJAX & Web API – Codepolitan
- Git – Codepolitan
